

# FEEDBACK SURVEY

To help new students in their search for housing, we would like to ask for your feedback so that we can share your comments with them and improve our service further. Answer as many or as few questions as you like.

What did you like and/or dislike about the shared spaces in the house?

There is enough shared space among the communal areas that I never found we got in each others way enough to be a problem. They are great places to hang out and chat with each other about your day. There is only one laundry machine amongst six people so you may have to wait your turn but it surprisingly did not happen enough to be a problem.

What did you like and/or dislike about your room?

It was clean, in good shape and plenty of places to put storage if you put your mind too it. Its just a standard, good quality room.

What did you like and/or dislike about sharing residence with other girls?

My housemates were all mature people who were serious about their education. We were all respectful of each other and our schedules.

What did you like and/or dislike about the service from the landlord, cleaning lady, and superintendent?

The landlord is quick to address any issues you may have and the cleaning lady is very thorough. You'd probably be hard pressed to find better people to rent from.

What did you like and/or dislike about living off-campus?

Living off-campus provides an escape from school. Traveling everyday isn't the greatest with OC Transpo being unreliable most days. You have to plan your travel time accordingly to make it on time. I found it was far better for my mental state to be able to get away from campus to unwind everynight and cook in a quiet private house.

What did you like and/or dislike about the location, neighbourhood, and/or overall convenience?

I loved the nearby Gabriel's Pizza. They make great pizza and have great customer service. They are within walking distance so I pick it up myself and avoid delivery fees. The two close bus stops are excellent. Either one provides a direct route for groceries. The 88 cannot be expected to ever be on time though. The roads were quiet at night too with only the odd loud car.

Would you like to include your name and/or social media handle to add authenticity?

I would rather not.
